2016–2023

PROFESSIONAL SUMMARY

Versatile Full Stack Developer, UI/UX Designer, and Web3 Engineer with 3+ years of professional experience building high-impact web applications, scalable admin platforms, and blockchain-powered systems. Contributed to aiskool.com — architecting auth systems, migrating databases, and managing VPS infrastructure. Published mobile app developer (Parsi Calendar on Google Play). IT Department Head at Techshala. 15+ hackathons with 2 first-place wins. Passionate about merging technical depth with thoughtful, user-centric design.

PROFESSIONAL EXPERIENCE

Full Stack Developer AISKool.com — AI & Robotics EdTech Platform

- Redesigned and enhanced the admin panel, significantly improving usability for course, event, and student management.
- Architected and implemented a complete authentication system: registration, login, session handling, and role-based access control.
- Designed and built backend APIs from scratch to support the platform's full feature set, replacing Supabase's managed layer with custom, optimised server-side logic.
- Led full database migration from Supabase to a self-hosted PostgreSQL server on a dedicated VPS — zero data loss, improved query performance, and complete ownership of the data layer.
- Managed full VPS lifecycle: server setup, Nginx config, SSL certificates, deployment pipelines, and ongoing security hardening.
- Improved overall platform design, UI consistency, and system reliability.

IT Department Head Techshala — Vidyalankar Polytechnic

- Led the college's student IT body — overseeing technical projects, workshops, and developer mentorship programmes.
- Architected and delivered techshala.vpt.edu.in: a full-featured platform with a 10-module admin panel (events, users, leaderboard, freelance, VAC learning tracks, team management, role-based control).

Ethical Hacking Intern Secure Cyber Future

- Trained in offensive security: SQL Injection, XSS, Google Dorking, Brute Force attacks, and vulnerability assessment.
- Conducted structured penetration testing exercises and produced remediation-focused documentation.

FREELANCE CLIENT PROJECTS

AISkool.com — AI & Robotics EdTech Platform

aiskool.com

Next.js PostgreSQL VPS Auth SEO

- Admin panel redesign, full authentication system, Supabase → self-hosted PostgreSQL VPS migration, server management, security hardening, and UI improvements.

Marudhar Metals

marudharmetals.com

Next.js PostgreSQL Admin Panel SEO

- Complete company website with fully customisable CMS-style admin panel and technical SEO optimisation.

Tarannum Khan — Dermatology & Skincare Platform

tarannumkhan.in

Next.js PostgreSQL eCommerce Booking

- Online consultation booking, skincare eCommerce (cart, orders, stock alerts), analytics dashboard (revenue, orders, users), admin controls, doctor profile, and system settings.

Techshala Platform

techshala.vpt.edu.in

Next.js PostgreSQL Admin Panel SEO

- 10-module admin platform: events, users, leaderboard, freelance module, VAC learning tracks, showcase, team management, and role-based access control.

PERSONAL & HACKATHON PROJECTS

Parsi Calendar — Google Play Store

React Native Expo TypeScript Mobile

- Published mobile app for the Parsi/Zoroastrian community — create, view, and receive reminders for events on both Parsi and Gregorian calendars. Monthly, weekly, and agenda views with an intuitive interface.

VibeTune — AI Mood Music Player

OpenCV Python Web Speech API Spotify API TypeScript

- Intelligent music player with facial emotion detection (OpenCV + FER), voice commands (play/pause/next/volume), Spotify 30-second preview playback across 686 pre-categorised tracks, mood timeline visualisation, and dynamic UI colour theming (Happy, Sad, Energetic, Calm).

Mind — Mental Wellness Companion

AI TypeScript Voice Chat React

- AI therapist app with mood detection, voice chat, brain/focus improvement games, and mental health support features.

ETH Mumbai 2026 — AI Trading Agent (1st Place Winner)

Python Ethereum AI Agent Pyth Oracle Multi-chain

- Conversational blockchain trading agent — natural language commands execute multi-chain trades, real-time price data via Pyth Oracle, DEX routing (e.g. 'Swap 10 USDC to ETH'), secure private key management, and enterprise-grade asset control.

ETHOnline 2025 — Global Borderless Payment System

TypeScript PYUSD Arbitrum Blockchain

- UPI-like global payment system built on blockchain using PYUSD on the Arbitrum network for instant, low-fee cross-border transactions.

ETHGlobal New Delhi 2025 — AI Trading Agent

AI Agent Ethereum NLP TypeScript

- AI agent executing blockchain trades via natural language — multi-chain swaps, real-time analytics, and digital asset management with enterprise security.

BNB Hackathon — AI Smart Contract Deployer

AI Agent BNB Chain Solidity TypeScript

- Deploy smart contracts, create tokens, and mint NFTs using a single AI command — ultra-low fees on BNB Chain.

UniChain Internal Hackathon — University Management on Blockchain

TypeScript Blockchain Smart Contracts

- University management platform: timetable creation, teacher assignment, result publishing, and degree certificates issued on-chain for tamper-proof verification.

TokenPlusNFT-Launcher

Solidity EVM TypeScript Web3

- Web3 tool for launching custom ERC-20 tokens and NFT collections on Ethereum-compatible chains.
